Overview

Introduction

The Pexels API enables programmatic access to the full Pexels content library, including photos, videos. All content is available free of charge, and you are welcome to use Pexels content for anything you'd like, as long as it is within our [Guidelines](#).

The Pexels API is a RESTful JSON API, and you can interact with it from any language or framework with a HTTP library. Alternately, Pexels maintains some official [Client Libraries](#) you can use.

If you have any questions, feel free to check out our [FAQ](#) or email us at api@pexels.com.

Note: For historical reasons, all endpoints begin with

<https://api.pexels.com/v1/> except for video endpoints, which begin with https://api.pexels.com/videos/. Please see the individual endpoints listed below for more details about how to call each endpoint.

Guidelines

Whenever you are doing an API request make sure to show a **prominent link to Pexels**. You can use a text link (e.g. "Photos provided by Pexels") or a link with our logo.

Always credit our photographers when possible (e.g. "Photo by John Doe on Pexels" with a link to the photo page on Pexels).

You may not copy or replicate core functionality of Pexels (including making Pexels content available as a wallpaper app).

Do not abuse the API. By default, the API is rate-limited to 200 requests per hour and 20,000 requests per month. **You may contact us to request a higher limit**, but please include examples, or be prepared to give a demo, that clearly shows your use of the API with attribution. If you meet our API terms, you can get unlimited requests for free.

Abuse of the Pexels API, including but not limited to attempting to work around the rate limit, will lead to termination of your API access.

Client Libraries

Pexels maintains a number of official API client libraries that you can use to interact with the Pexels API:

Language	Package	Github	Changelog	Version
Ruby	rubygems	pexels-ruby	changelog	0.3.0
Javascript	npm	pexels-javascript	changelog	1.2.1
.net	nuget	PexelsDotNetSDK	changelog	1.0.6

Please read the documentation for the client library you'd like to use for more information about syntax (code samples for each library are available on this documentation). Issues and Pull Requests on Github are also welcome!

If you have created an unofficial Pexels API library for a different language please feel free to let us know about it!

Authorization

Authorization is required for the Pexels API. Anyone with a Pexels account can [request an API key](#), which you will receive instantly.

All requests you make to the API will need to include your key. This is provided by adding an `Authorization` header.

LINKING BACK TO Pexels

Copy

```

1 <a href="https://www.pexels.com">Photos provided by Pexels</a>
2
3 <!-- or show our white logo -->
4
5 <a href="https://www.pexels.com">
6   
7 </a>
8
9 <!-- or show our black logo -->
10
11 <a href="https://www.pexels.com">
12   
13 </a>

```

LINKING BACK TO A PHOTO

Copy

```

1 This <a href="https://www.pexels.com/photo/food-dinner-lunch-meal-414

```

EXAMPLE OF AUTHORIZATION

Bash

Copy

```

1 curl -H "Authorization: iZraxTuzxXHx161M17DW0m3XW6zIFkii5e6PzgGcA1vB1
2   "https://api.pexels.com/v1/search?query=people"

```

Request Statistics

To see how many requests you have left in your monthly quota, successful requests from the Pexels API include three HTTP headers:

Response Header	Meaning
<code>X-Ratelimit-Limit</code>	Your total request limit for the monthly period
<code>X-Ratelimit-Remaining</code>	How many of these requests remain
<code>X-Ratelimit-Reset</code>	UNIX timestamp of when the currently monthly period will roll over

Note: These response headers are only returned on successful (`2xx`) responses. They are not included with other responses, including `429 Too Many Requests`, which indicates you have exceeded your rate limit. Please be sure to keep track of `X-Ratelimit-Remaining` and `X-Ratelimit-Reset` in order to manage your request limit.

Pagination

Most Pexels API requests return multiple records at once. All of these endpoints are paginated, and can return a maximum of **80** requests at one time. Each paginated request accepts the same parameters and returns the same pagination data in the response.

Note: The `prev_page` and `next_page` response attributes will only be returned if there is a corresponding page.

EXAMPLE OF RATE LIMIT HEADERS

```
1 X-Ratelimit-Limit: 20000
2 X-Ratelimit-Remaining: 19684
3 X-Ratelimit-Reset: 1590529646
```

Copy

PAGINATION REQUEST PARAMETERS

```
GET https://api.pexels.com/v1/curated?page=2&per_page=40
```

Copy

PAGINATION RESPONSE ATTRIBUTES

```
{
  "page": 2,
  "per_page": 40,
  "total_results": 8000,
  "next_page": "https://api.pexels.com/v1/curated?page=3&per_page=40",
  "prev_page": "https://api.pexels.com/v1/curated?page=1&per_page=40"
}
```

The Photo Resource

The `Photo` resource is a JSON formatted version of a Pexels photo. The Photo API endpoints respond with the photo data formatted in this shape.

Response

`id` integer

The id of the photo.

`width` integer

The real width of the photo in pixels.

`height` integer

The real height of the photo in pixels.

`url` string

The Pexels URL where the photo is located.

`photographer` string

The name of the photographer who took the photo.

`photographer_url` string

The URL of the photographer's Pexels profile.

`photographer_id` integer

The id of the photographer.

THE PHOTO RESOURCE

```
1 {
2   "id": 2014422,
3   "width": 3024,
4   "height": 3024,
5   "url": "https://www.pexels.com/photo/brown-rocks-during-golden-hour",
6   "photographer": "Joey Farina",
7   "photographer_url": "https://www.pexels.com/@joey",
8   "photographer_id": 680589,
9   "avg_color": "#978E82",
10  "src": {
11    "original": "https://images.pexels.com/photos/2014422/pexels-photo-2014422.jpg",
12    "large2x": "https://images.pexels.com/photos/2014422/pexels-photo-2014422.jpg?auto=compress&w=940",
13    "large": "https://images.pexels.com/photos/2014422/pexels-photo-2014422.jpg?auto=compress&w=940",
14    "medium": "https://images.pexels.com/photos/2014422/pexels-photo-2014422.jpg?auto=compress&w=467",
15    "small": "https://images.pexels.com/photos/2014422/pexels-photo-2014422.jpg?auto=compress&w=150",
16    "portrait": "https://images.pexels.com/photos/2014422/pexels-photo-2014422.jpg?auto=compress&w=150",
17    "landscape": "https://images.pexels.com/photos/2014422/pexels-photo-2014422.jpg?auto=compress&w=940",
18    "tiny": "https://images.pexels.com/photos/2014422/pexels-photo-2014422.jpg?auto=compress&w=40"
19  },
20  "liked": false,
21  "alt": "Brown Rocks During Golden Hour"
22 }
```

Copy

avg_color string
The average color of the photo. Useful for a placeholder while the image loads.

src object
An assortment of different image sizes that can be used to display this [Photo](#).

[+ SHOW CHILDREN](#)

alt string
Text description of the photo for use in the `alt` attribute.

Search for Photos

[GET `https://api.pexels.com/v1/search`](https://api.pexels.com/v1/search)

This endpoint enables you to search Pexels for any topic that you would like. For example your query could be something broad like [Nature](#), [Tigers](#), [People](#). Or it could be something specific like [Group of people working](#).

Parameters

query string | required
The search query. [Ocean](#), [Tigers](#), [Pears](#), etc.

orientation string | optional
Desired photo orientation. The current supported orientations are: [landscape](#), [portrait](#) or [square](#).

size string | optional
Minimum photo size. The current supported sizes are: [large](#) (24MP), [medium](#) (12MP) or [small](#) (4MP).

color string | optional
Desired photo color. Supported colors: [red](#), [orange](#), [yellow](#), [green](#), [turquoise](#), [blue](#), [violet](#), [pink](#), [brown](#), [black](#), [gray](#), [white](#) or any hexidecimal color code (eg. `#ffffff`).

locale string | optional
The locale of the search you are performing. The current supported locales are: [en-US](#) | [pt-BR](#) | [es-ES](#) | [ca-ES](#) | [de-DE](#) | [it-IT](#) | [fr-FR](#) | [sv-SE](#) | [id-ID](#) | [pl-PL](#) | [ja-JP](#) | [zh-TW](#) | [zh-CN](#) | [ko-KR](#) | [th-TH](#) | [nl-NL](#) | [hu-HU](#) | [vi-VN](#) | [cs-CZ](#) | [da-DK](#) | [fi-FI](#) | [uk-UA](#) | [el-GR](#) | [ro-RO](#) | [nb-NO](#) | [sk-SK](#) | [tr-TR](#) | [ru-RU](#).

page integer | optional
The page number you are requesting. [Default: 1](#)

per_page integer | optional
The number of results you are requesting per page. [Default: 15](#)
[Max: 80](#)

Response

photos array of [Photo](#)
An array of [Photo](#) objects.

page integer
The current page number.

EXAMPLE REQUEST

[Bash](#) [Copy](#)

```
1 curl -H "Authorization: iZraxTuzxXhx161M17DWm3XWGzIFkiI5e6PzgGcA1vB1
2   "https://api.pexels.com/v1/search?query=nature&per_page=1"
```

EXAMPLE RESPONSE

[Copy](#)

```
1 {
2   "total_results": 10000,
3   "page": 1,
4   "per_page": 1,
5   "photos": [
6     {
7       "id": 3573351,

17        "large2x": "https://images.pexels.com/photos/3573351/pexels-large2x.jpg",
18        "large": "https://images.pexels.com/photos/3573351/pexels-large.jpg",
19        "medium": "https://images.pexels.com/photos/3573351/pexels-medium.jpg",
20        "small": "https://images.pexels.com/photos/3573351/pexels-small.jpg",
21        "portrait": "https://images.pexels.com/photos/3573351/pexels-portrait.jpg",
22        "landscape": "https://images.pexels.com/photos/3573351/pexels-landscape.jpg",
23        "tiny": "https://images.pexels.com/photos/3573351/pexels-tiny.jpg"
24      },
25      "liked": false,
26      "alt": "Brown Rocks During Golden Hour"
27    }
28  ],
29  "next_page": "https://api.pexels.com/v1/search/?page=2&per_page=15"
30 }
```

per_page integer
The number of results returned with each page.

total_results integer
The total number of results for the request.

prev_page string | optional
URL for the previous page of results, if applicable.

next_page string | optional
URL for the next page of results, if applicable.

Curated Photos

GET <https://api.pexels.com/v1/curated>

This endpoint enables you to receive real-time photos curated by the Pexels team.

We add at least one new photo per hour to our curated list so that you always get a changing selection of trending photos.

Parameters

page integer | optional
The page number you are requesting. **Default: 1**

per_page integer | optional
The number of results you are requesting per page. **Default: 15**
Max: 80

Response

photos array of [Photo](#)

An array of [Photo](#) objects.

page integer
The current page number.

per_page integer
The number of results returned with each page.

total_results integer
The total number of results for the request.

prev_page string | optional
URL for the previous page of results, if applicable.

next_page string | optional
URL for the next page of results, if applicable.

Get a Photo

GET <https://api.pexels.com/v1/photos/:id>

Retrieve a specific [Photo](#) from its id.

Parameters

id integer | required
The id of the photo you are requesting.

EXAMPLE REQUEST

Bash  Copy

```

```

min_width integer | optional
The minimum width in pixels of the returned videos.

min_height integer | optional
The minimum height in pixels of the returned videos.

min_duration integer | optional
The minimum duration in seconds of the returned videos.

max_duration integer | optional
The maximum duration in seconds of the returned videos.

page integer | optional
The page number you are requesting. [Default: 1]

per_page integer | optional
The number of results you are requesting per page. [Default: 15]
Max: 80

Response

videos array of [Video](#)

An array of [Video](#) objects.

url string

The Pexels URL for the current page.

page integer

The current page number.

per_page integer

The number of results returned with each page.

total_results integer

The total number of results for the request.

prev_page string | optional

URL for the previous page of results, if applicable.

next_page string | optional

URL for the next page of results, if applicable.

EXAMPLE RESPONSE

```

Overview

Pexels Collections are a way to group specific photos and videos into one unified gallery. This can be useful if, for example, you want to expose a specific subset of Pexels content to your users. You can access all your collections and the media within them via the Pexels API.

Note: Collections cannot be created or modified using the Pexels API. Rather, you can manage your collections on the Pexels website, iOS or Android app. API only gives you access to **featured collections** and **your own collections**.

The Collection Resource

The `[Collection]` resource is a JSON formatted version of a Pexels collection. The Collection list endpoint responds with the collection data formatted in this shape.

Response

<code>id</code> string
The id of the collection.
<code>title</code> string
The name of the collection.
<code>description</code> string
The description of the collection.
<code>private</code> boolean
Whether or not the collection is marked as private.
<code>media_count</code> integer
The total number of media included in this collection.
<code>photos_count</code> integer
The total number of photos included in this collection.
<code>videos_count</code> integer
The total number of videos included in this collection.

Featured Collections

`GET https://api.pexels.com/v1/collections/featured`

This endpoint returns all featured collections on Pexels.

Parameters

THE COLLECTION RESOURCE

```
1  {

2   "https://api.pexels.com/v1/collections/featured?per_page=1"
```

page integer | optional
The page number you are requesting. **Default: 1**

per_page integer | optional
The number of results you are requesting per page. **Default: 15**
Max: 80

Response

collections array of `Collection`

An array of `Collection` objects.

page integer

The current page number.

per_page integer

The number of results returned with each page.

total_results integer

The total number of results for the request.

prev_page string | optional

URL for the previous page of results, if applicable.

next_page string | optional

URL for the next page of results, if applicable.

EXAMPLE RESPONSE

```
1  {

18   "prev_page": "https://api.pexels.com/v1/collections/featured/?page=1"
19 }
```

My Collections

`GET https://api.pexels.com/v1/collections`

This endpoint returns all of your collections.

Parameters

page integer | optional

The page number you are requesting. **Default: 1**

per_page integer | optional

The number of results you are requesting per page. **Default: 15**

Max: 80

Response

collections array of `Collection`

An array of `Collection` objects.

page integer

The current page number.

per_page integer

The number of results returned with each page.

total_results integer

The total number of results for the request.

prev_page string | optional

URL for the previous page of results, if applicable.

next_page string | optional

URL for the next page of results, if applicable.

EXAMPLE REQUEST

```
1 curl -H "Authorization: iZraxTuzxXHx161M17DWm3XWgZiFkii5e6PzgGcA1vB1"
2   "https://api.pexels.com/v1/collections?per_page=1"
```

EXAMPLE RESPONSE

```
1  {
2    "collections": [
3      {

19 }
```

Collection Media

GET <https://api.pexels.com/v1/collections/:id>

This endpoint returns all the media (photos and videos) within a single collection. You can filter to only receive photos or videos using the `type` parameter.

Parameters

`type` string | optional

The type of media you are requesting. If not given or if given with an invalid value, all media will be returned. Supported values are `photos` and `videos`.

`page` integer | optional

The page number you are requesting. `Default: 1`

`per_page` integer | optional

The number of results you are requesting per page. `Default: 15`
`Max: 80`

Response

`id` string

The id of the collection you are requesting.

`media` array of `Photo` or `Video` objects.

An array of media objects. Each object has an extra `type` attribute to indicate the type of object.

`page` integer

The current page number.

`per_page` integer

The number of results returned with each page.

`total_results` integer

The total number of results for the request.

`prev_page` string | optional

URL for the previous page of results, if applicable.

`next_page` string | optional

URL for the next page of results, if applicable.

Changelog

This is a list of major changes to the Pexels API.

2022-09-15

- Added `video_file.fps` attribute for the `Video` resource.

2021-12-14

- Added `alt` attribute to the `Photo` resource.
- Added previously-exposed `liked` attribute to the `Photo` responses.

2021-09-13

- Updated `image` attribute for the `Video` resource to use the correct orientation.
- Removed `video_picture_picture` attribute for the `Video` resource.

EXAMPLE REQUEST

```
1 curl -H "Authorization: iZraxTuzxXHx161M170W0m3XWGzIFkiI5e6PzgGcA1vB1
2   "https://api.pexels.com/v1/collections/9mp14cx?per_page=1"
```

EXAMPLE RESPONSE
